

Multiple users can stream simultaneously for a single screen plan on Netflix (₹149)

- **Device Type:** Mobile Phone
- **OS:** Android 12
- **Tester:** Srijan Rai
- **Software version:** Netflix (Version 8.51.0 build 6 50325)
- **Rate of Reproduction:** Tested Successful for every attempt.

Steps to Reproduce a Bug

- Open the Netflix application in two Android Mobile devices with same account having plan of single screen Basic HD (₹149).
- Stream any video on the Netflix application, in any one of the device.
- Then, stream any video on the other device with logged in with same account.
- Boom, you will end up streaming video on both the devices simultaneously. If Warning appears select retry and enjoy the double screen stream on a single screen plan.
 - The user, who started video stream later, will face some minor difficulties in stream but he can stream the same video from beginning but just hitting the retry button.
 - If users are streaming same video on both the devices then they can stream videos on both the devices without any difficulty.
 - Difficulties that can be faced by the second user:
 - He can't skip the introduction, or he can't forward the video stream.
 - If warning arises in between the video stream then the video will start from the beginning on hitting the retry button.

Expected Result

As per the plan issued by the Netflix a basic plan that costs ₹149 supports one device at a time.
